DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6, 14, and 16-18 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: the examiner is unaware of any prior art which suggests the use of nickel or titanium in the applicant's explicit percentages in conjunction with any one of the elements of rhodium, ruthenium, iridium, osmium, or platinum in an insulating film which is to be used in capacitor.
3. Kingon et al. (USPN 5,555,486) discloses a ferroelectric capacitor. Kingon discusses certain amounts of metal that are used for the bottom electrode of the capacitor; however these percentages pertain to platinum and its combination with ruthenium oxide. Thus Kingon does not teach the applicant's invention.
